

How to carve your Pineapple

1. Use a large knife to cut the top off the pineapple (do not throw away) and scoop out flesh with an icecream scoop
2. Drain the juice out into a bowl or glass (save it and make punch!)
3. Carefully remove the pineapple core at its base using the small knife and pat the inside dry with paper towels
4. Once hollow, secure stencil firmly with tape
5. Trace the outline of the stencil by poking holes using a sharp metal skewer
6. Remove stencil and carve along pattern using paring knife
7. Insert flameless candle and place top of pineapple back on

SAFETY: Ensure carving takes place on a flat, dry surface. Always take care when handling knives.
